

SWIMAGE
Rebuild. Recover. Secure. Instantly.

Solving the Toughest Endpoint Challenges — Automatically

Stop wasting time on manual rebuilds, compliance checks, and remote recovery. Swimage automates it all.

The illustration shows a desktop monitor and a laptop. The monitor displays a large red gear with 'API' inside, a code editor with '</>' symbols, and a network diagram with a pink gear labeled 'API'. The laptop also shows a red gear with 'API'.

Swimage is a software platform that automates the full PC lifecycle—spanning OS imaging, security, backups, migrations, recovery, and more—with enterprise-grade orchestration.

Why IT Leaders Choose Swimage
